HSCA Statement on Recent Executive Order to Promote Domestic Production of Critical Medicines

Washington, DC (May 20, 2025) – Healthcare Supply Chain Association (HSCA) President and CEO Angie Boliver today released the following statement:

“HSCA and its traditional healthcare group purchasing organization (GPO) members applaud the Trump Administration’s recent Executive Order on Regulatory Relief to Promote Domestic Production of Critical Medicines. HSCA has long advocated for policymakers to encourage investments in manufacturing capacity *and* quality, which are of critical importance for hospitals and the patients they serve. We support the Administration’s efforts to align foreign manufacturing facility inspections with those conducted domestically, including by increasing the fees for and number of inspections. Moreover, HSCA supports the order’s provisions focused on streamlining the permitting and construction of domestic manufacturing facilities. Expediting the building process for pharmaceutical manufacturing sites will help suppliers scale up domestic production quickly. We hope to continue working with the Administration on its domestic production objectives moving forward.”

About the Healthcare Supply Chain Association (HSCA)

The Healthcare Supply Chain Association ([HSCA](https://www.supplychainassociation.org)) represents the nation’s leading healthcare group purchasing organizations (GPOs), which are critical cost-savings partners to America’s hospitals, homes, nursing home pharmacies, clinics, home healthcare providers and surgery centers. GPOs deliver billions in savings annually to healthcare providers, Medicare and Medicaid, and taxpayers. HSCA and its member GPOs are committed to delivering the best products at the best value to healthcare providers, to increasing competition and innovation in the market, and to being supply chain leaders in transparency and accountability.
